

Part 2 – Segment characteristics by class × clock rank [CHOL]

1 = earliest CNA in sample | 2 = second | 3+ = third or later
KW = Kruskal–Wallis | Dunn BH–corrected (* <0.05, ** <0.01, *** <0.001)

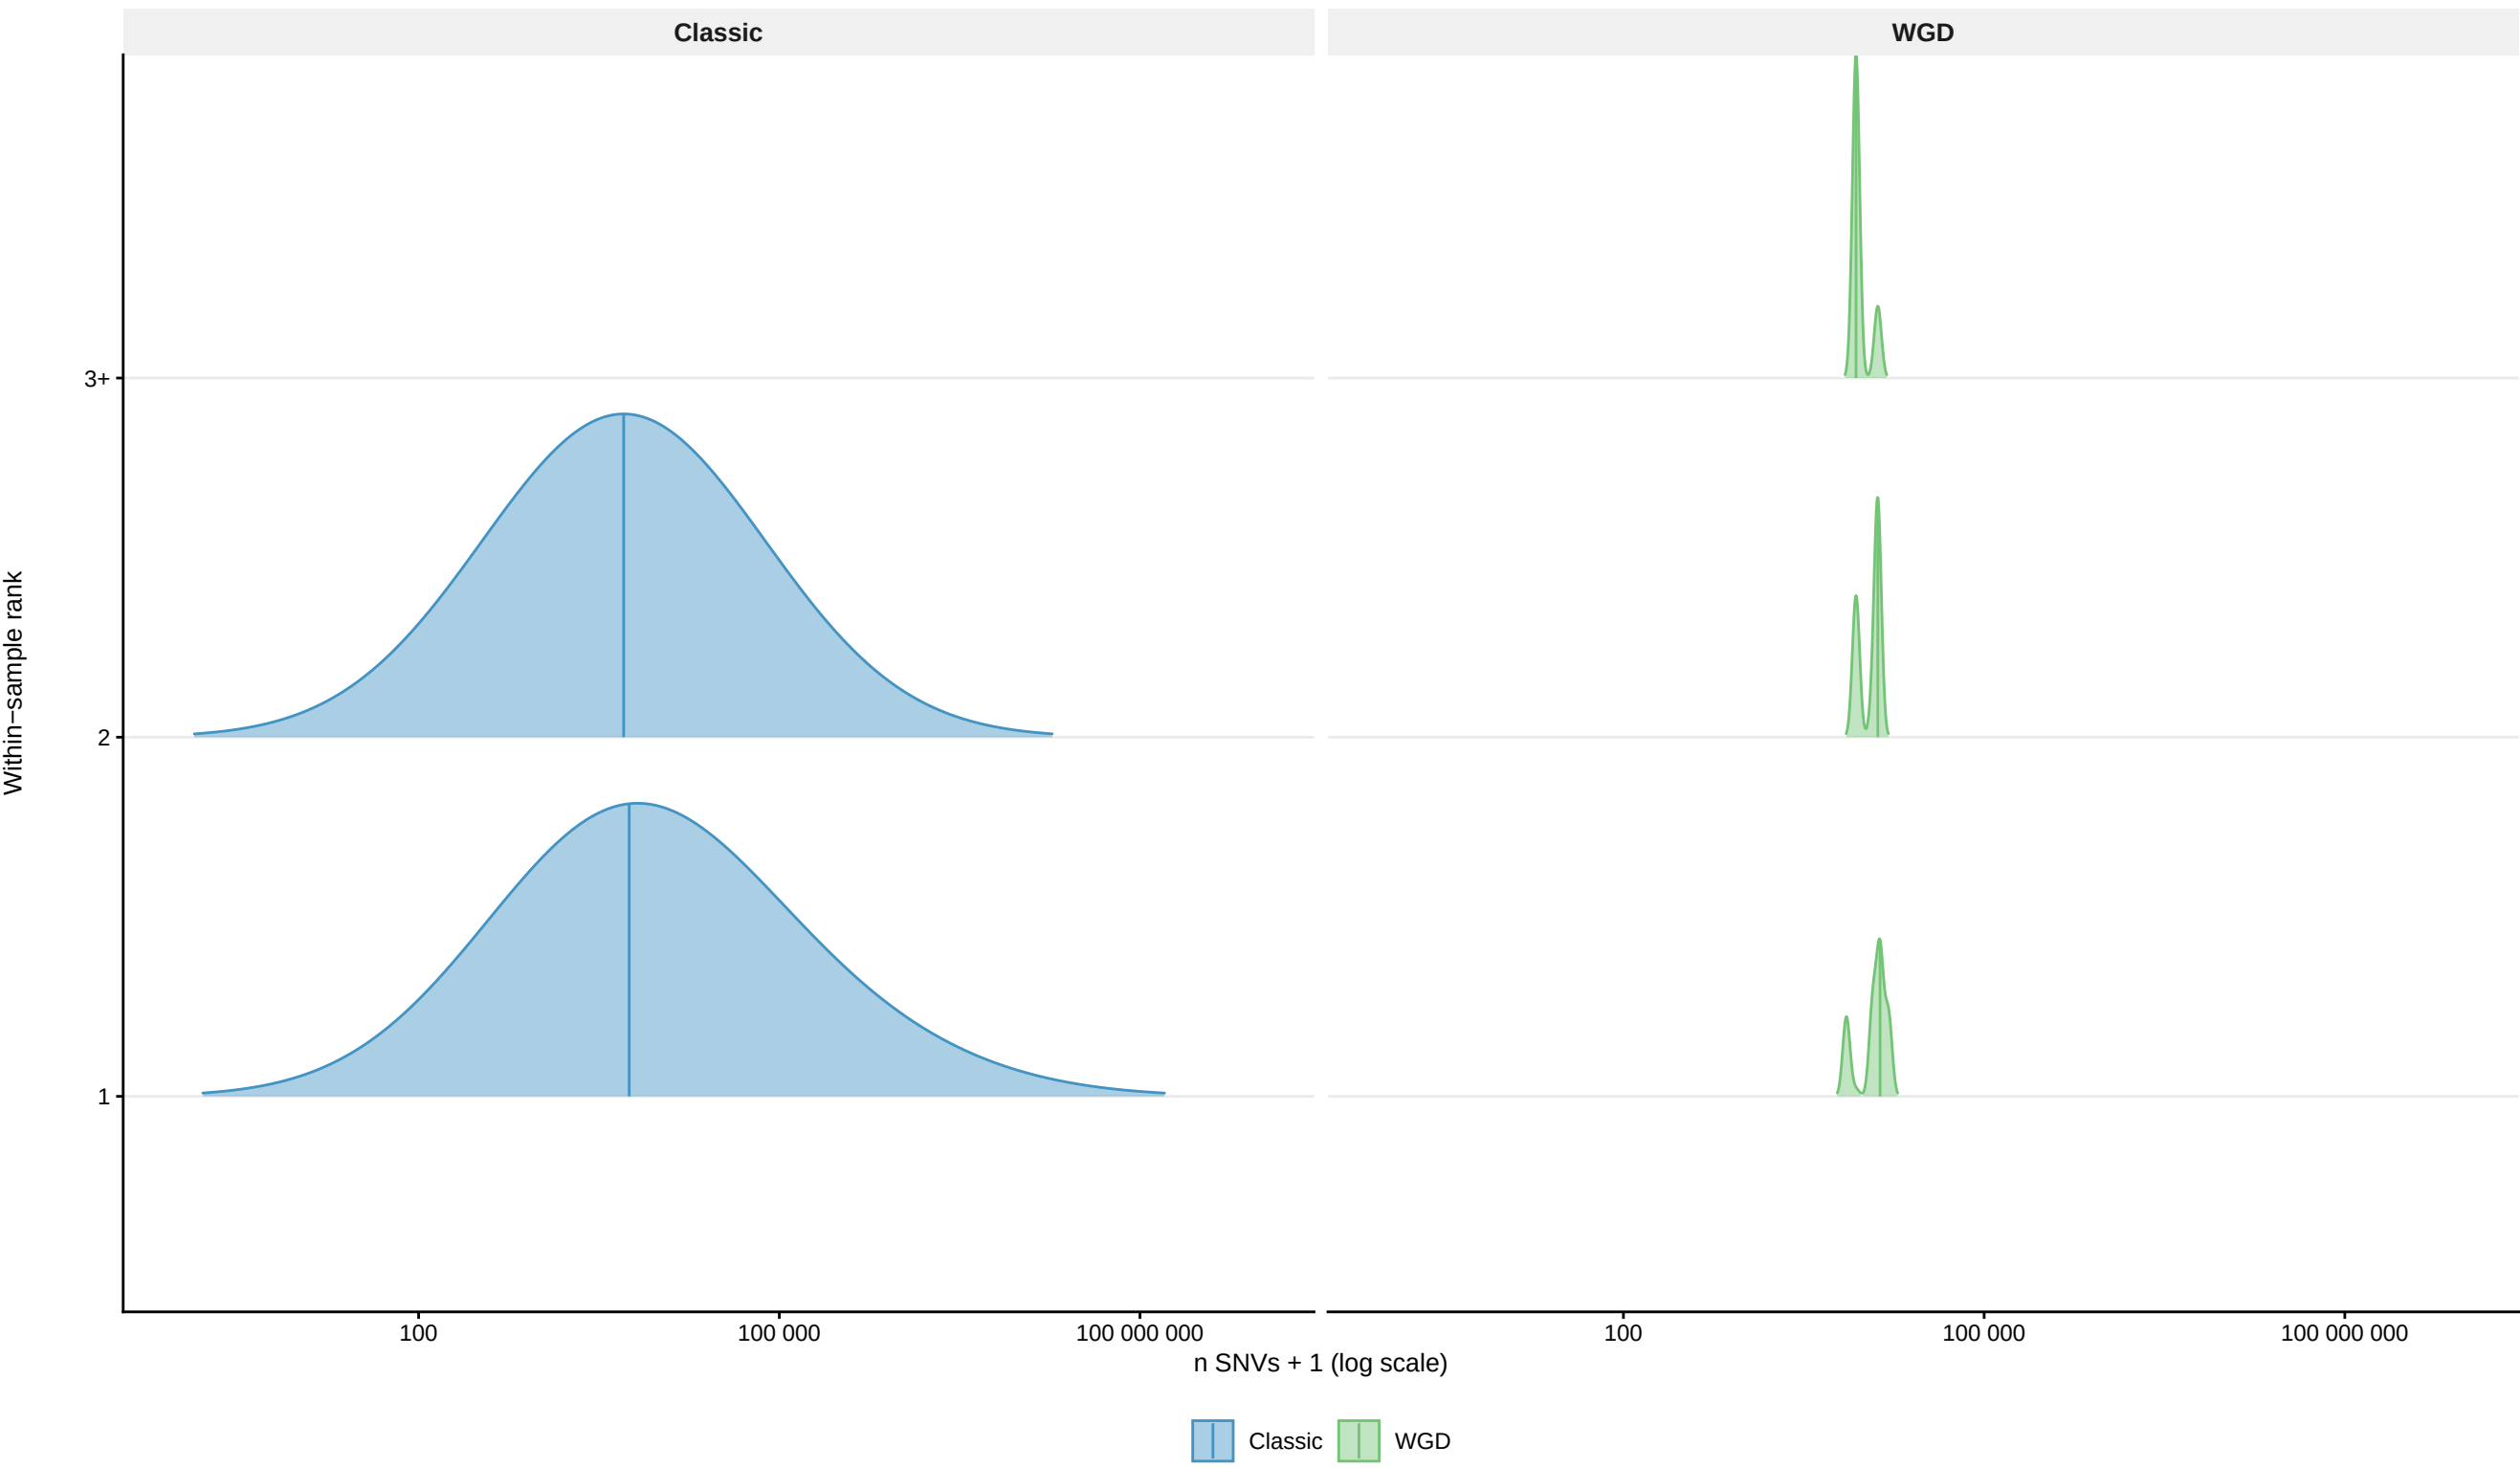

Segment length by within–sample clock rank

1 = earliest event in sample | 3+ = third or later

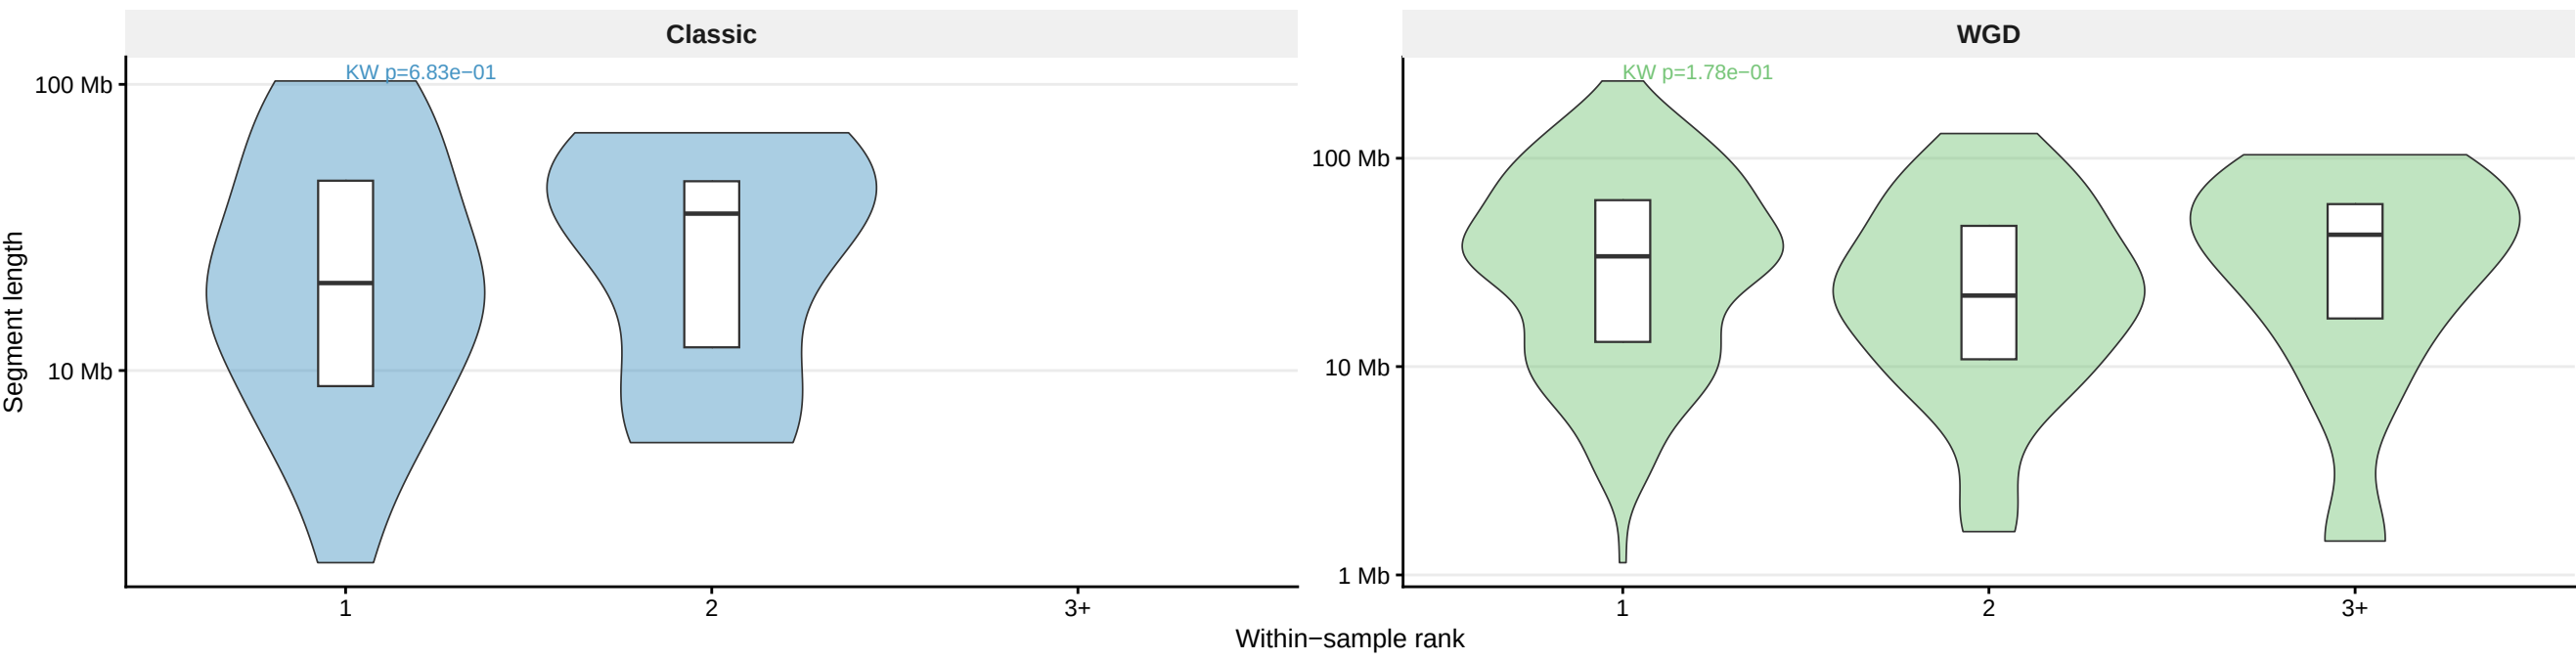

n SNVs by within–sample clock rank

1 = earliest event in sample | 3+ = third or later

Segment length across within–sample clock ranks

Label = KW p per class | brackets = Dunn BH–corrected

n SNVs across within–sample clock ranks

Label = KW p per class | brackets = Dunn BH–corrected
