

Part 3 – Chromosome coverage density [CCRCC]

Normalised by chromosome length and n samples per cell

Chromosome coverage density by class × clock rank

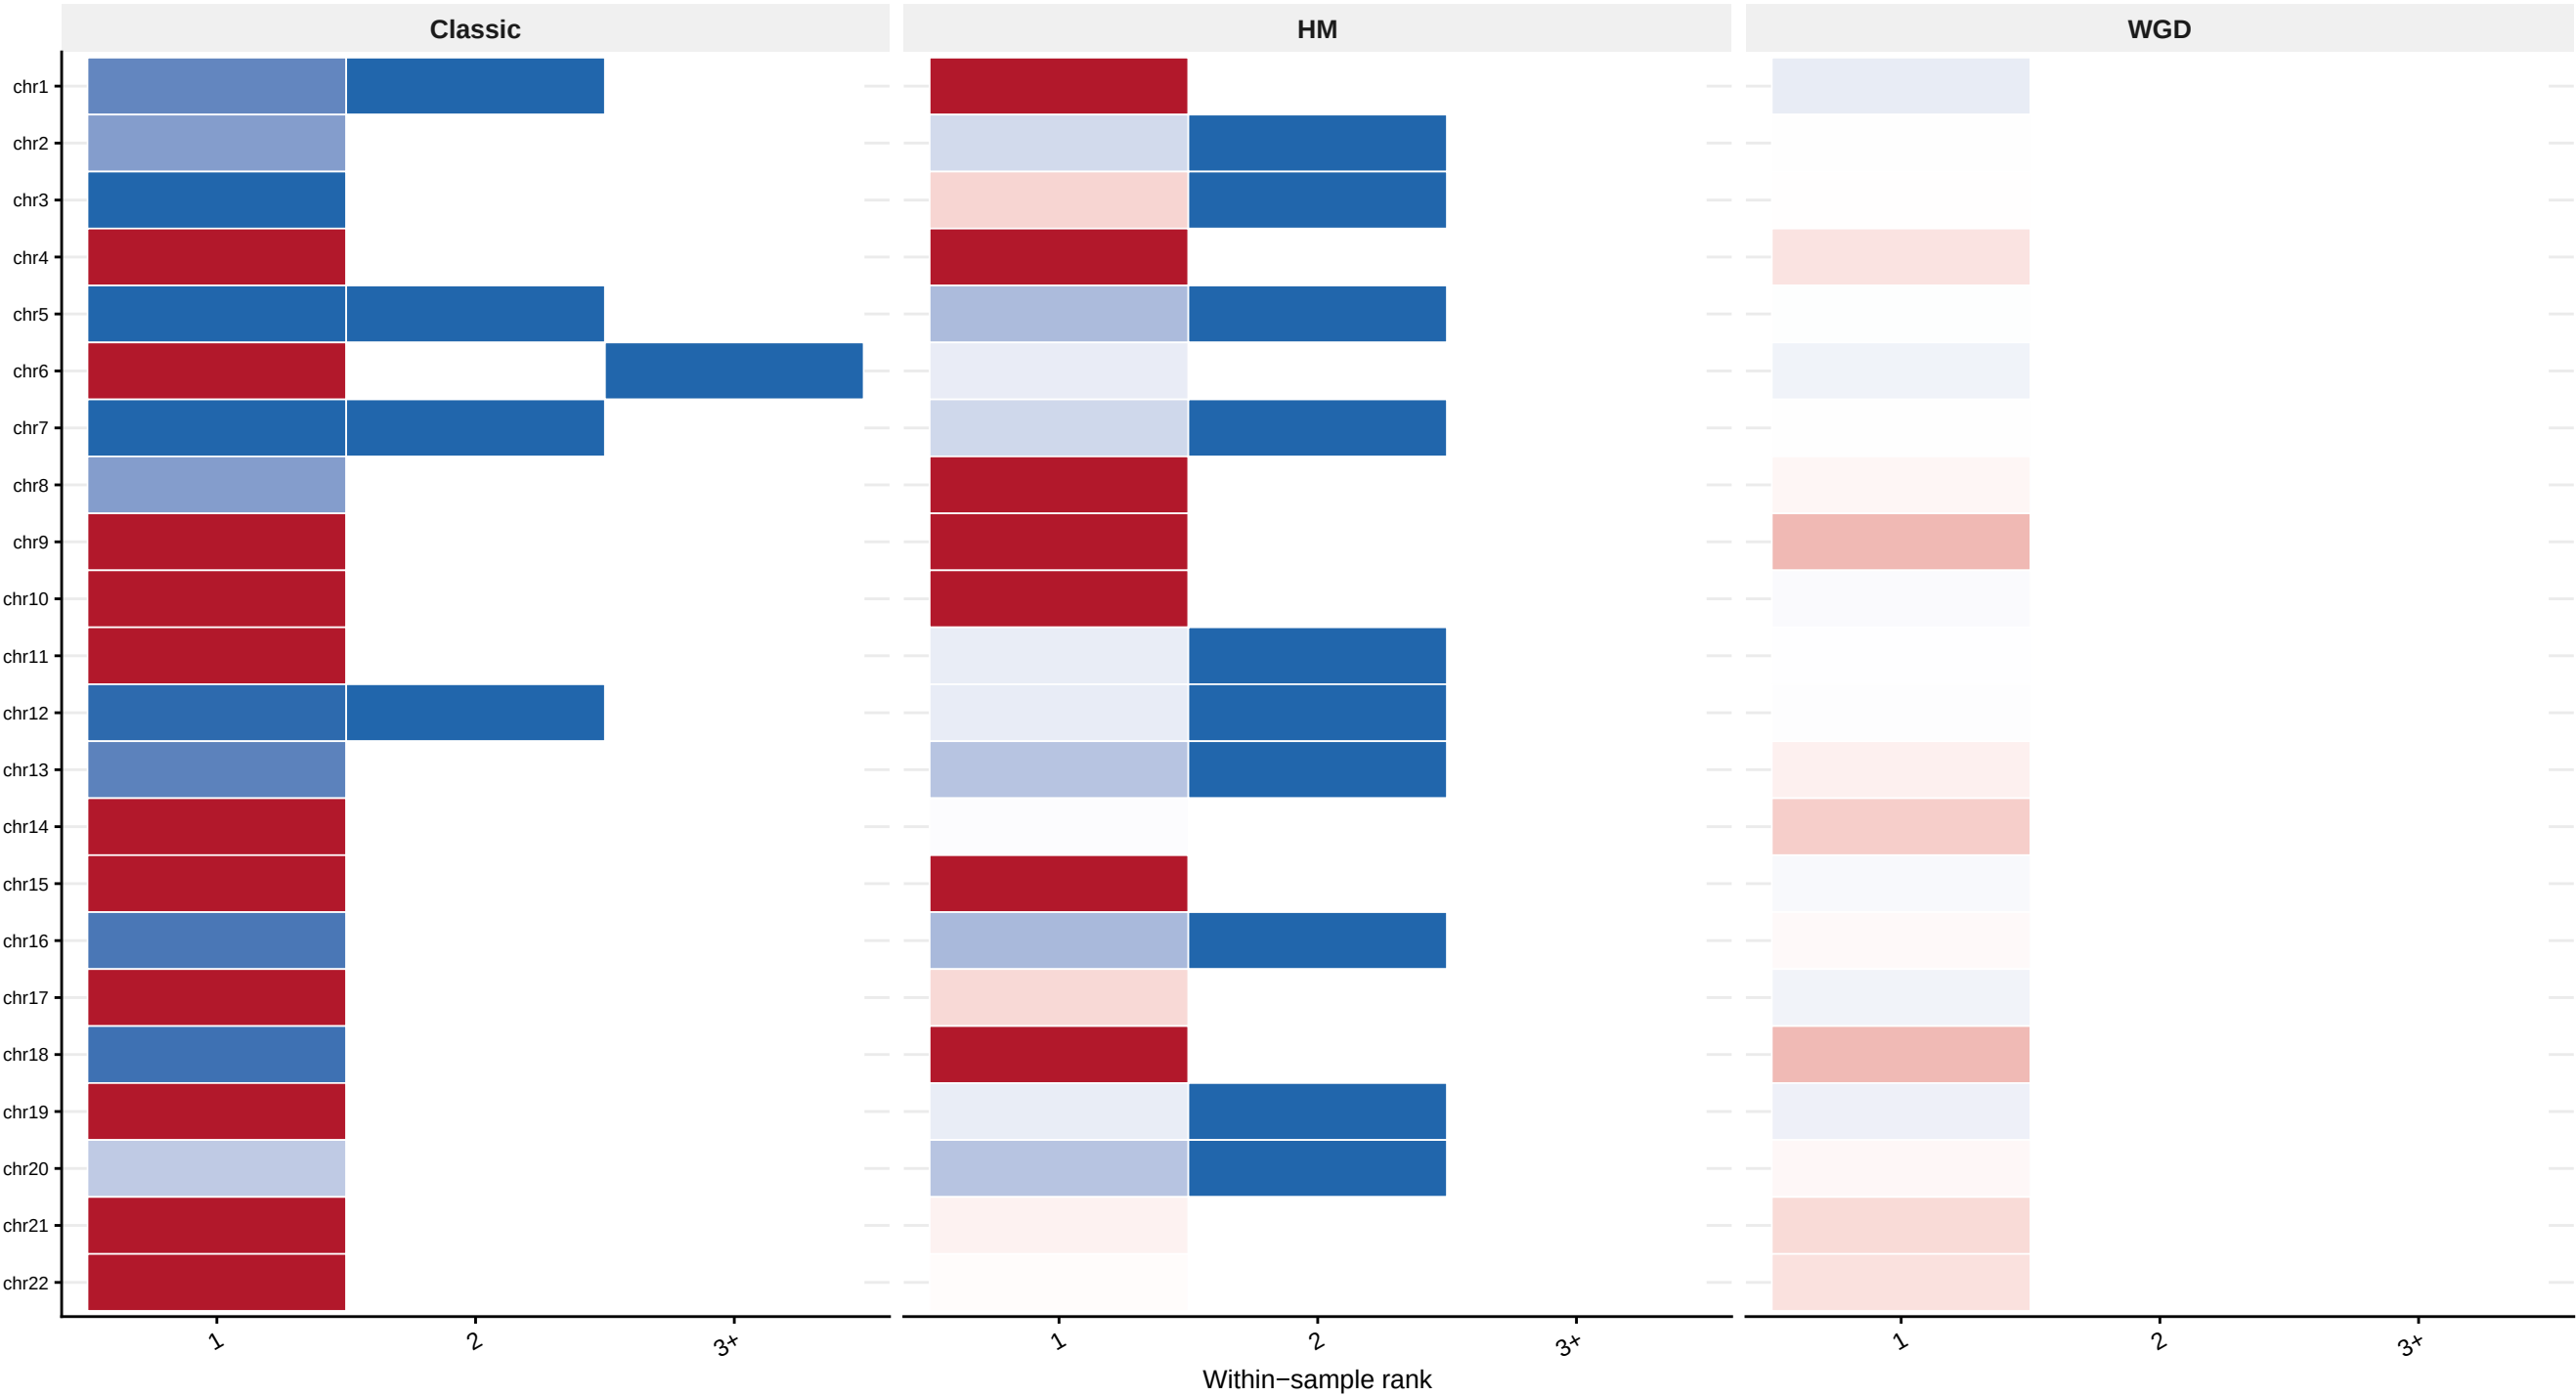

Colour = sum(seg length) / chr length / n_samples | Stars = Wilcoxon vs row median (BH)

Mean coverage density / sample 0.0% 25.0% 50.0% 75.0%

Relative coverage density (log2 ratio vs row median)

Red = depleted | Blue = enriched relative to class × rank median

log2(density / row median) -3 -2 -1 0 1 2 3
