

Part 2 – Segment characteristics by class × within-sample clock rank

Rank 1 = earliest CNA in sample | Rank 2 = second | Rank 3+ = third or later
KW = Kruskal-Wallis | Dunn post-hoc BH-corrected (* <0.05, ** <0.01, *** <0.001)

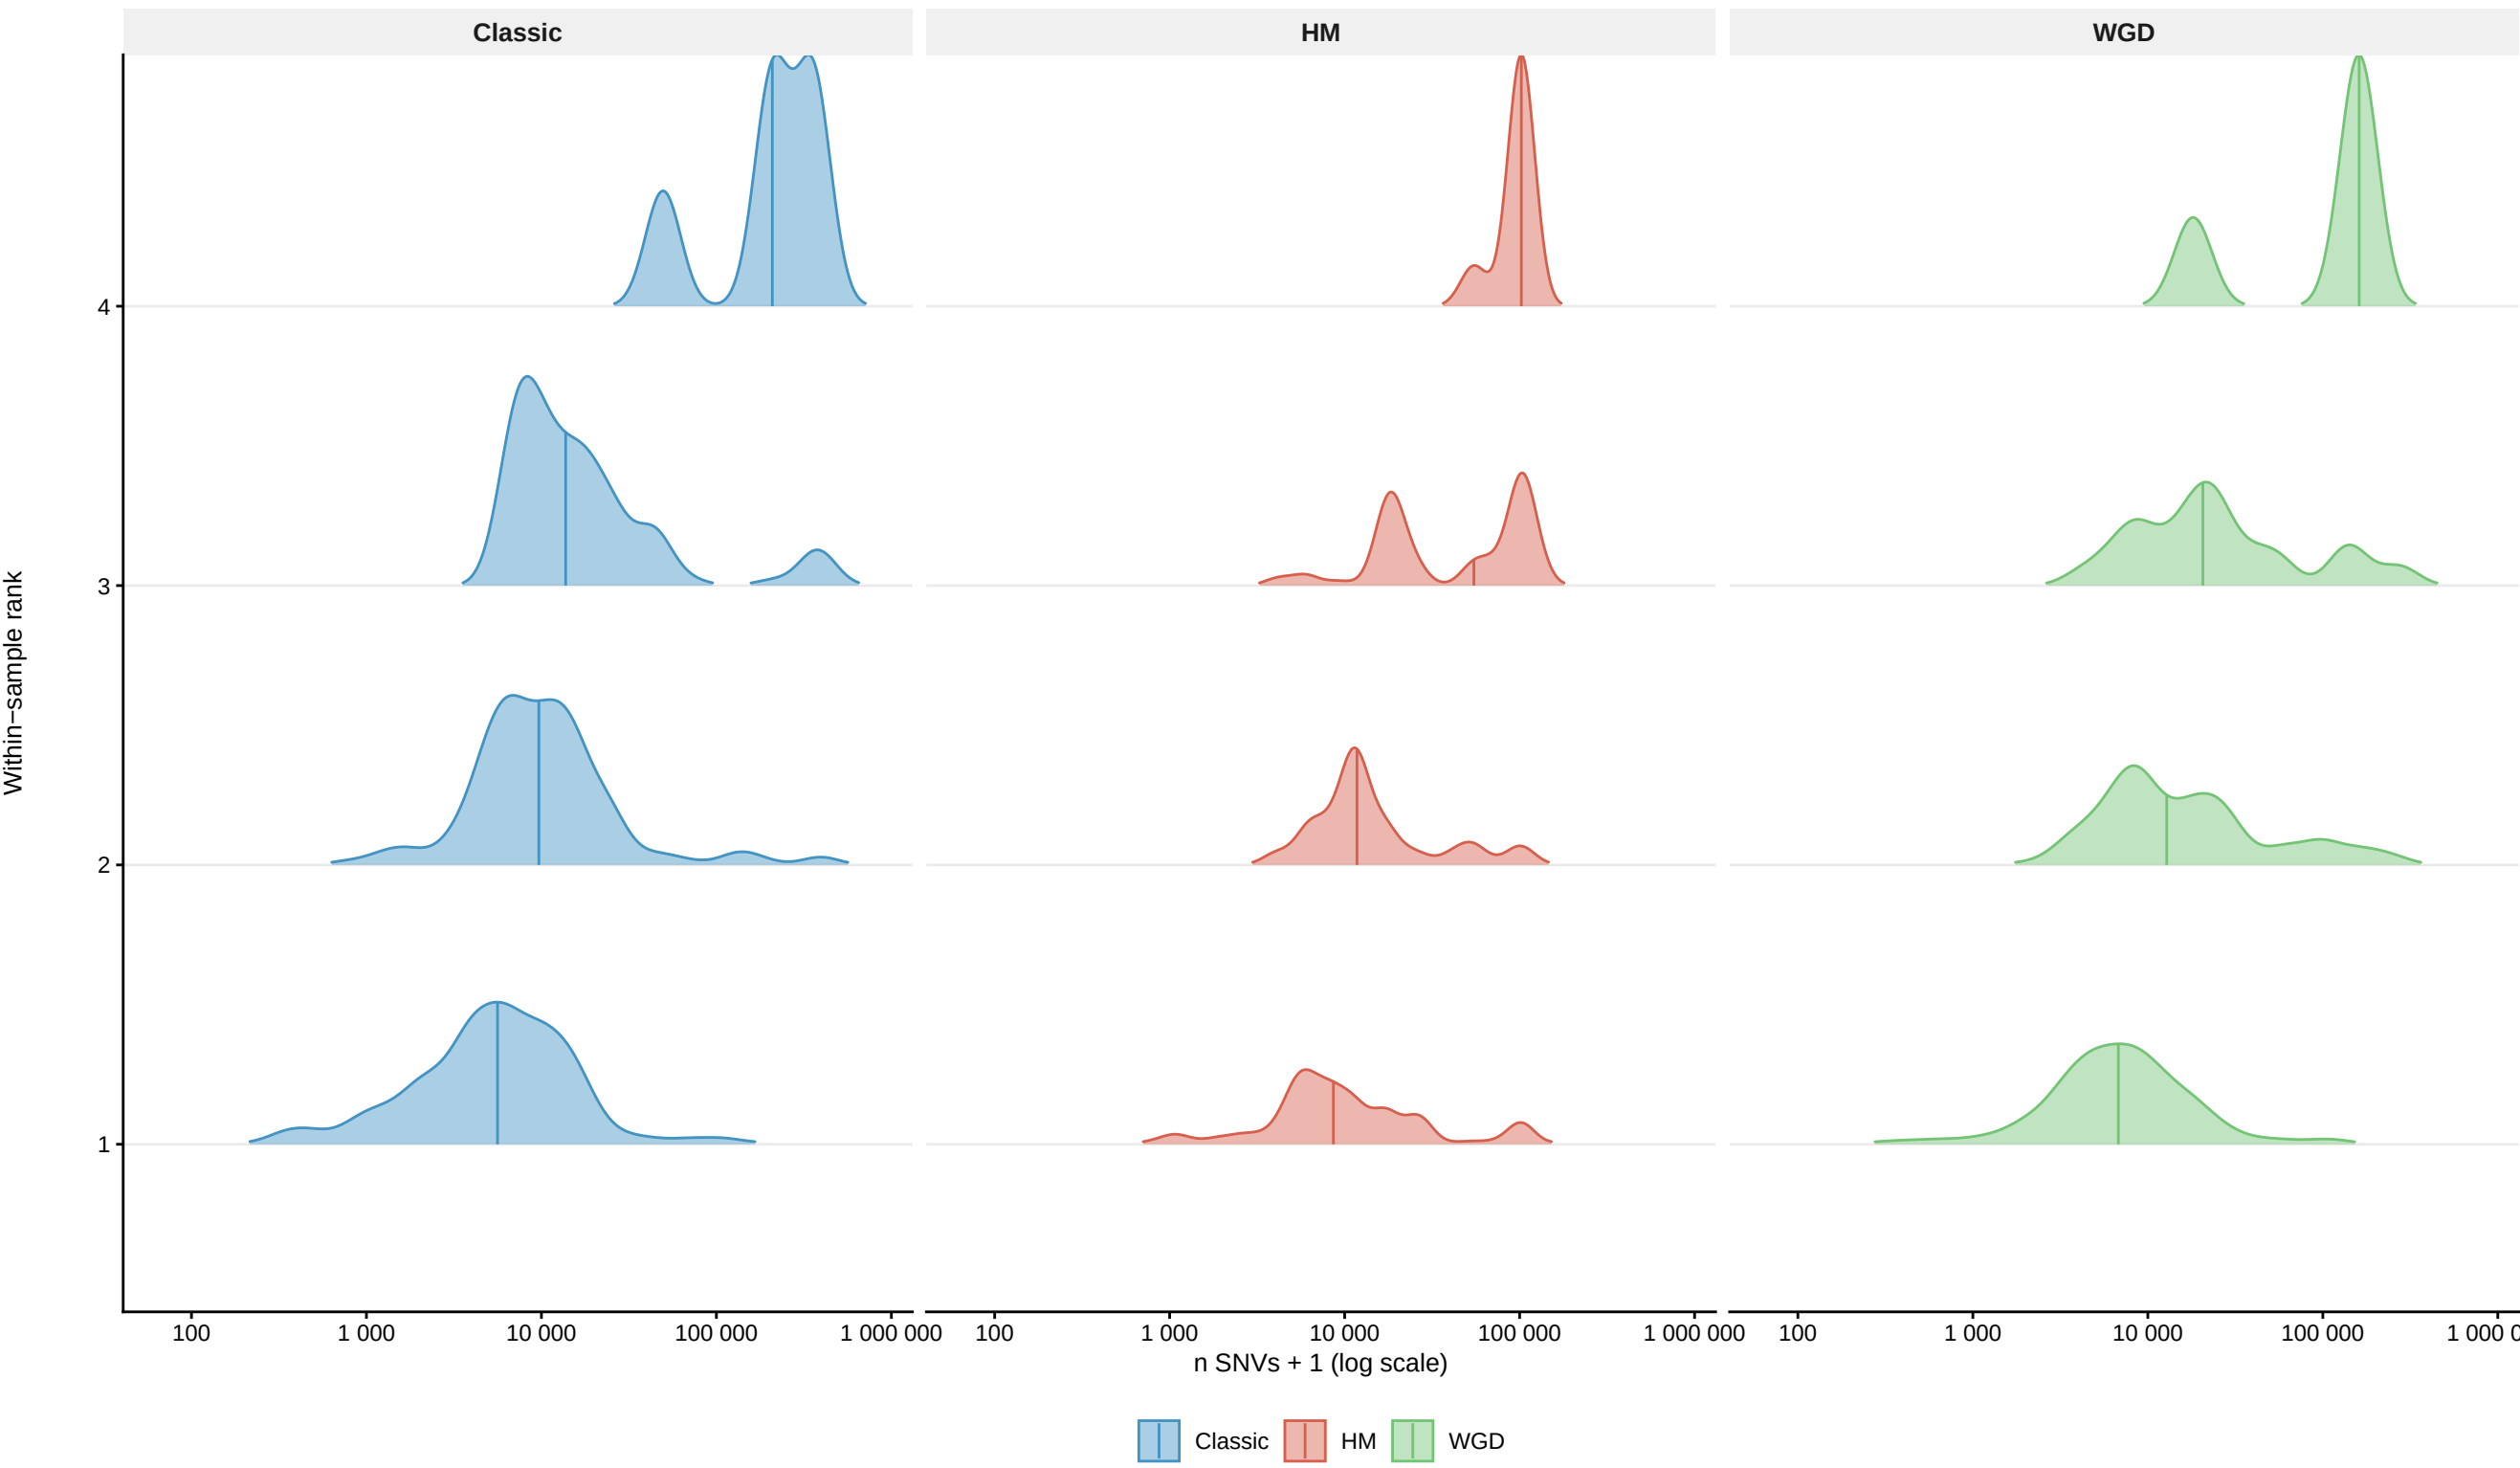

Segment length by within-sample clock rank

Rank 1 = earliest event in sample | Rank 3+ = third or later

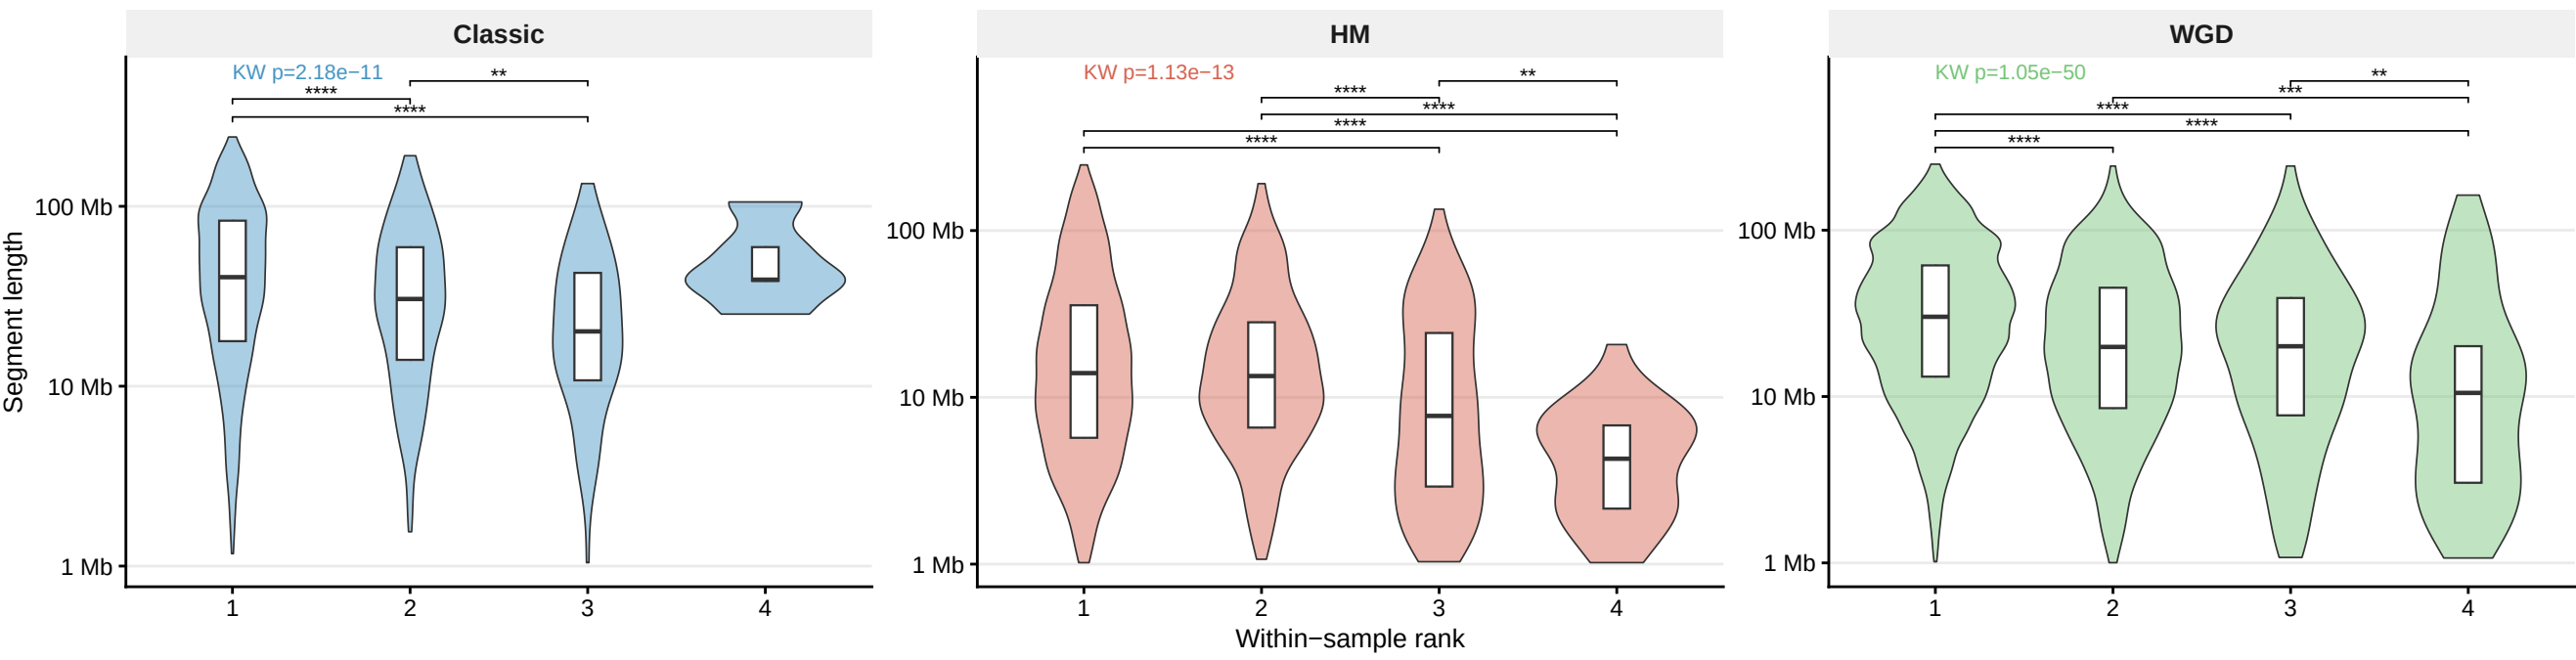

n SNVs by within-sample clock rank

Rank 1 = earliest event in sample | Rank 3+ = third or later

Segment length across within-sample clock ranks

Label = KW p per class | brackets = Dunn BH-corrected

n SNVs across within-sample clock ranks

Label = KW p per class | brackets = Dunn BH-corrected
